- **Sapling Distribution 2021**

Tree plantation is very necessary because trees provide oxygen to the environment and make the air quality better. If more trees are planted, then the world's environment will become a safer place to live in. Tree plantation also reduces pollution, thus making the life of future generations secure. A remarkable initiative dedicated to that was conducted by City College, Jayanagar. The focal point was distribution of saplings, symbolizing the Institution's. Each sapling represented a commitment to a greener, healthier planet, underlining the collective responsibility and spirit of positive change. All the MBA students have participated in the tree plantation and distribution of the trees. Not only the students but even the faculties were involved in planting the trees. The total number of distribution was 20 saplings. The best practice is even followed when any guest visit the college he/she is presented by the sapling as the token of love.

Objective:

- 1) Protect the environment by creating an awareness
- 2) To protect the plants
- 3) Volunteer yourself to trees plantation.
- 4) Climate change is one of the biggest concerns; the plantation of trees helps to balance the climate of a region and prevent sudden climate disturbance.

A wise man said, "save trees, save lives!". It holds true in our life; Deforestation has contributed much to global warming. Saving trees could mean more breathing air means more life.

- **Sapling Distribution 2022**

Tree plantation is very necessary because trees provide oxygen to the environment and make the air quality better. If more trees are planted, then the world's environment will become a safer place to live in. Tree plantation also reduces pollution, thus making the life of future generations secure. The sole intention is to conserve our resources for the future generations. City College has taken an initiation to create an awareness to the students and people about planting the tree. The total number of sapling distribution was 30.

- **Sapling Distribution 2023**

Encouragement to plant a tree and distribution of saplings gives students the knowledge they need to make informed decisions about how to improve the environment. Tree plantation is very necessary because trees provide oxygen to the environment and make the air quality better. If more trees are planted, then the world's environment will become a safer place to live in. Tree plantation also reduces pollution, thus making the life of future generations secure. The tree planting activity resulted in positive attitudes of students towards environmental awareness. Planting trees can be a social responsibility, as it helps build community awareness and promotes collective action towards a common goal. The total number of sapling distribution was 50.

World Environment Day Celebration 2024

World Environment Day is the perfect occasion to explore the nature in the surroundings. On the occasion of 'World Environment Day', 5th June 2024, the NSS Students of the College joined hands with the rest of the world to commemorate this important day. In a spirited celebration of World Environment Day, students and faculty members of City College came together to distribute the sapling and provide awareness about planting a tree towards the environment to the general public. Crowded areas like Metro station, police station, 4th block jayanagar were the places where distribution of the sapling has been taken place.

Total of 60 saplings were distributed by the Students. City College has taken this initiative so that no only the society but also students can be aware of protecting the environment in a proper manner.
